The new numbering is composed of a letter and 3 numbers.

CHARACTERISTICS

- Possibility to obtain the access code from BOSSWeb. It is no longer required to call BRP
- Each B.U.D.S. targets specific vehicle (product line and model year)
- Requires use of MPI-2 vehicle interface, with D.E.S.S. Post Interface, if necessary). Former MPI (VCK) which was obsoleted in 2008 is no longer supported
